OBJECTIVE

I am looking for my first opportunity as a **Systems Analyst**. In my last internship, I worked as a **full stack** developer, creating **automated** and efficient solutions from front-end to back-end. I worked with technologies such as Angular, .NET, C#, HTML, TypeScript, SQL Server, Entity Framework Core, Docker, and Azure DevOps, as well as building RESTful APIs with JWT authentication. I am highly interested in applying this knowledge to innovative projects, especially in automation and **artificial intelligence**. I aim to contribute with creative ideas, solve real problems, and grow alongside the team. I believe in technology as a tool for transformation and I'm ready to contribute with dedication, fast learning, and a strong desire to make a difference.

EXPERIENCE

1. ZCK SOFTWARE SOLUTIONS

Intern – Full Stack Development

(2024 – 2025)

Key Skills

- Full stack development with Angular (frontend) and .NET (backend).
- Integration with SQL Server and Entity Framework Core.
- Development of RESTful APIs and JWT authentication.
- Configuration of CI/CD pipelines in Azure DevOps and containerization with Docker.

Project: ConcreLink – Concrete Plant Management System

Full stack development of a system for controlling and optimizing concrete production, from material entry to final delivery. Frontend built with Angular 16 using Visual Studio Code, and backend with C# and .NET 8 using Visual Studio. Data management handled with Entity Framework Core and SQL Server. The project was containerized with Docker and automated with CI/CD pipelines in Azure DevOps, ensuring fast and reliable deployments.

Results

Automated the production control in concrete plants, developing the system from scratch to handle client registration, material tracking, and production management. Eliminated manual processes that caused delays and errors, resulting in a 30% increase in operational efficiency, reduced stock issues, and faster decision-making.

2. FONTES & BORBA LAW FIRM

Legal Intern – Civil Law

(2018 – 2019)

- Focused on Civil Law cases.
- Responsible for drafting initial petitions.
- Attended hearings and procedures at the courthouse alongside the lead attorney.
- Assisted with administrative tasks and organized legal documentation.

EDUCATION

SYSTEMS ANALYSIS AND DEVELOPMENT

Centro Universitário Nossa Senhora do Patrocínio
Completed | 2023 – 2025

LAW

Faculdade de Direito de Itu
Bachelor's Degree | 2017 – 2022

SKILLS

- **Programming Languages:** C#, Java, TypeScript, JavaScript, HTML, CSS
- **Frameworks & Tools:** ASP.NET, Angular 16, Node.js, Entity Framework Core, Docker, Azure, DevOps
- **Databases:** SQL Server, MySQL
- **Version Control:** Git, GitHub, Git Flow
- **Other Technologies:** RESTful APIs, JWT Authentication, CI/CD, Postman

COURSES

ALURA – Full Stack Track

Java • JavaScript • Databases • C# • HTML • Python

LANGUAGES

- **Portuguese – Native**
- **English – Fluent (C1)**

ADDITIONAL INFORMATION

Available for flexible hours and travel. Based in Brazil (GMT-3) and open to collaborating across time zones.

Excellent **verbal and written communication skills**, developed throughout my Law degree, which also enhanced my ability to **argue, structure ideas, and produce clear written content**.

I enjoy reading, especially topics related to investigation, human behavior, and Law, which expand my critical thinking and creativity. I'm communicative, **team-oriented**, and easily connect with different audiences. I'm proactive, committed, and always eager to learn and grow, contributing effectively to the success of the projects I am involved in.
